Introduction

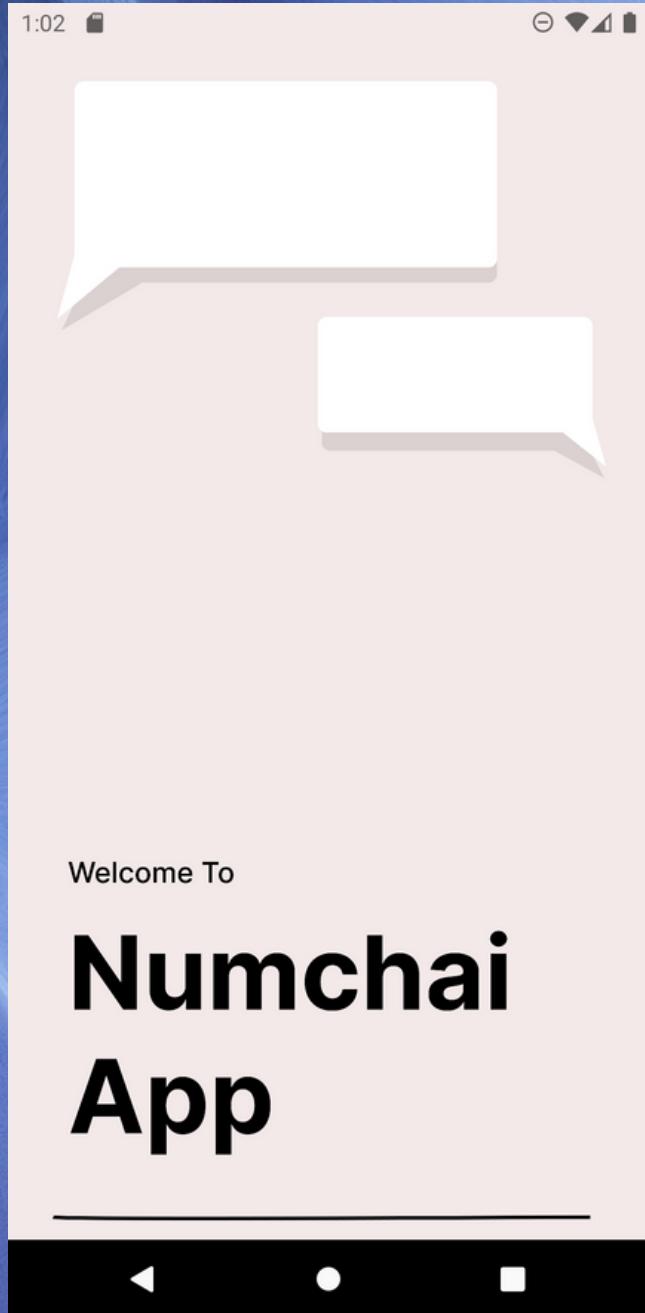

The "numchai app" was created to solve certain situations that cannot be fully expressed. The numchai app can address these situations by providing a platform for freely expressing opinions without revealing the identity of the users. This is done to reduce barriers to expressing thoughts in commenting.

02/ Analysis

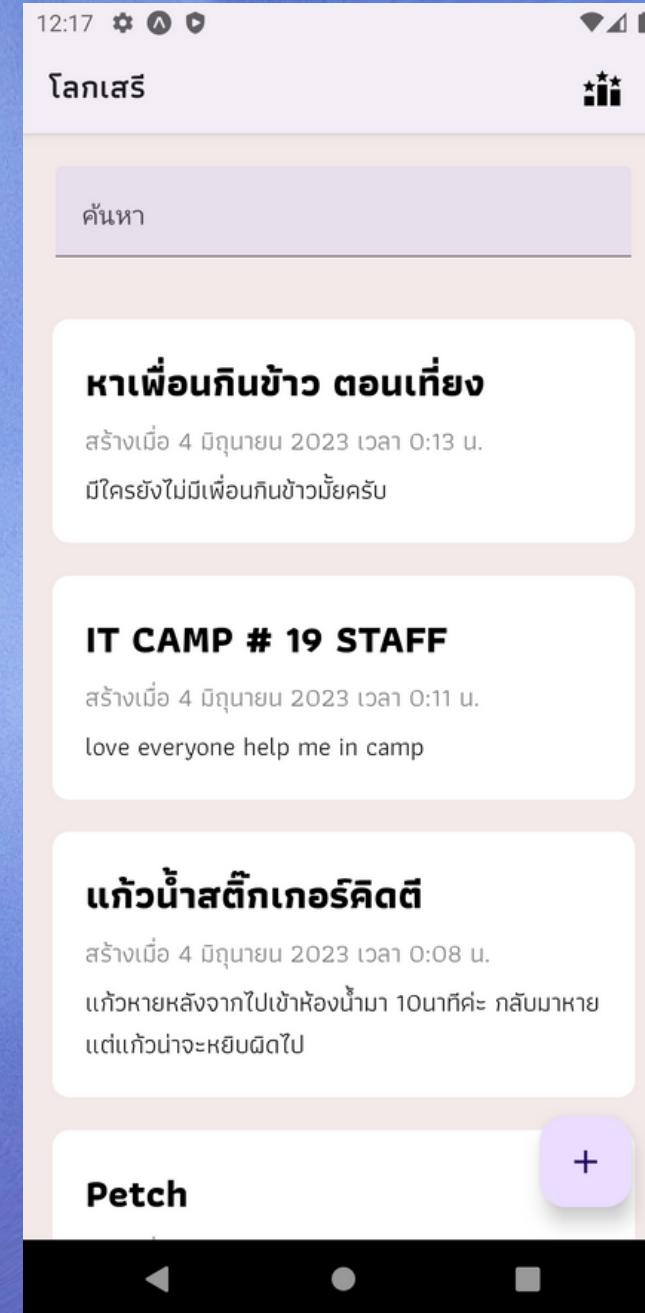

According to the survey conducted on a sample group of 30 Mobilant group, it was found that 27 individuals or 90% of the total stated that they prefer to express their opinions anonymously. Only 3 individuals or 10% of the total indicated otherwise. This is where the Numchai app can help address this issue.
